(PHOTOGRAPH) DEW-BLACK BERRY. SOME OF THE BERRIES
1 INCH IN DIAMETER

DEW-BLACKBERRY

This berry originated in Old Mexico by crossing the Dewberry and the Blackberry as the name signifies. The tips will root the first year, after that it stands and handles like a blackberry. Here are some of its good points:

(1) Small seeds; (2) self fertile; (3) large as Austin Dewberry; (4) no bitter taste like Dallas; (5) commences to ripen May 20th and ripens for five weeks; (6) produces a crop every year; (7) drouth resistant; (8) will produce from 1,000 to 1,400 gallons of fruit per acre.

PRICE OF PLANTS

Dozen, 95c; 50, \$2.75; 100, \$4.90; 1,000, \$31.00; 5,000, \$125.00. Postpaid.

We advise planting these plants four feet apart in the rows with rows 11 feet wide. This will require 1,000 plants per acre. An acre of Dew-Blackberries will make from \$150.00 to \$350.00 per acre.

Guarantee: We guarantee this berry to be equal and superior to any blackberry or dewberry grown and will replace price paid for plants to any purchaser who gives it a fair trial and is not satisfied.

PEACHES

When we decided to add fruit trees to our nursery business, I made up my mind to secure my buds from bearing trees growing in this section which had produced regular and profitable crops

Prices on peach trees prepaid:

Size	each	dozen	100
1 to 2 ft.	15c	\$1.65	\$12.00
2 to 3 ft.	20c	2.25	15.00
3 to 4 ft.	30c	3.10	21.00
4 to 5 ft.	50c	5.25	31.00
5 to 6 ft.	60c	6.50	38.75

May Peaches

Mayflower: Positively the earliest peach in the world. The peaches are red and are fine quality for such an early peach.

Early Wheeler: A large showy white cling, with red cheek.

June Peaches

Early Rose: I honestly believe this is the nearest frost-proof peach of any peach in the world. If the frost gets this peach you can rest assured that there will not be a peach left,

Cash Discount of 5% to those who come to the nursery to buy!

seedling or any other kind. When the trees of Early Rose are young the peaches are inclined to be small, but as the trees get older the peaches will get larger. Some years they bear so much they have to be thinned. Free from rot, good canner, brilliant red and fine for market. Extra fine quality. Gets ripe middle of June. This peach will be a leader everywhere. You would not go wrong to plant a thousand trees. In my hunt to find peaches that stand the cold I am placing Early Rose at the very top. Cling.

Best June: S. C. June 28. Light color, red cheek. Fruit large, most delicious. Regular and prolific bearer.

Mamie Ross: Originated in Dallas County, Texas. Large, white with cream blush on one side. White flesh, semi-cling.

Hobson: C. July 1. An improved Mamie Ross, ripening earlier. Firm.

Carman: F. July 5. Cross of Elberta and Mamie Ross. Large, white, red cheek.

Berta Ross: A cross between Elberta and Mamie Ross, introduced by one of our best peach men, R. B. Alexander of Weatherford, Texas. As the name implies, it has a perfect blend of its parents.

Rochester: Just like Elberta but ripe June 10th. The new sensation.

Golden Jubilee: This is a peach of great promise. It was created by the New Jersey experiment station by crossing one of Mr. Stubenrauch's peaches with another prominent variety. It is very similar to Elberta in shape and color but ripening June 20th. The flesh is yellow and of fine quality; a perfect freestone coming at a time when there is good market demand for peaches. Small trees 25c each.

July Peaches

Early Elberta: A rival of Elberta; character, size, color and quality the same, and ripens two to three weeks earlier.

Leona: F. July 8. Like Elberta in color and size, and better quality. Large, yellow with red cheek. Ripens earlier.

Belle of Georgia: A large white semi-cling. Ripe just ahead of Elberta.

Elberta: The Old Standard Freestone.

Indian: C. July 15. The kind our fathers knew when they were boys.

J. H. Hale: For fifteen years J. H. Hale has stood out above all other peaches grown, and its exceptional appearance and quality have made it a profitable commercial variety.

Gov. Lanham: C. July 15. One of the most beautiful and largest. Yellow, with bright red shadings. Firm, best of shippers. Origin Travis county.

Smith: Surest bearer we know. Small white freestone. Very delicious.

Stark's Elberta Cling: I secured my buds of this variety from Dallas Jobs of Gorman, Texas, who considers this one of the best peaches in his 70-acre orchard. It is ripe with Elberta but is longer in shape and more beautiful in color and better in quality.

August Peaches

Late Crawford: I secured my buds of this variety from Dr. Alexander of El Paso, Texas, and Dallas Jobs of Gorman, Texas. They both bought this peach as the Crawford. Fruit authorities say it is not the Crawford. It ripens with Augberta. Is a sure bearer and is a better peach in every way than Augberta. It is about two weeks later in ripening than Elberta. It will stand lower temperatures without killing than almost any variety. I consider this variety valuable for market. It is a good shipper.

Hart Cling: Very popular in Parker county. White with red cheek. Sure bearer, good shipper.

September Peaches

Henrietta: A most attractive yellow clingstone. High quality.

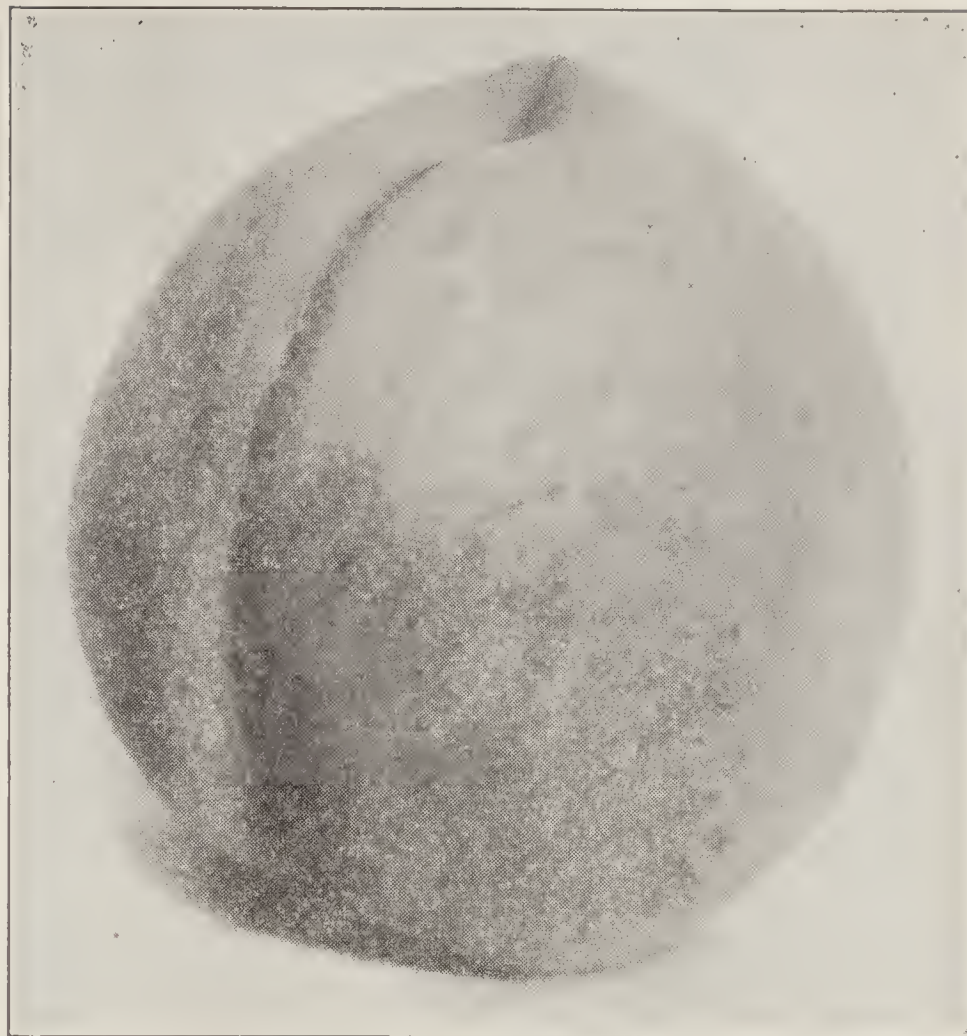

October Peaches

Stinson: Large white cling. Ripe in October.

Prices on the Stubenrauch Varieties—Frank, Tena, and Barbara. (Prices are prepaid):

Size	each	dozen	100
12-18-In.	15c	\$1.50	\$12.00
18-24-In.	25c	2.50	16.00
2-3 Ft.	35c	3.50	25.00
3-4 Ft.	45c	4.50	30.00
4-5 Ft.	55c	5.50	40.00
5-6 Ft.	75c	7.50	50.00

Cash Discount of 5% to those who come to the nursery to buy!

FRANK PEACH

Frank: Is one of the best commercial peaches yet shown. It was named for Frank Holland, editor of Farm & Ranch. It begins to ripen as Elberta is passing out about August 10th, and will hang on the trees without injury several days after it is ripe. The past year is its 33rd year that it has fruited without a miss in the Stubenrauch orchards. It is a rich yellow and red cling, above medium in size. Very uniform and a fine eating, canning and shipping peach. The tree is an extra strong grower, early bearer and heavy producer. The fruit should be thinned to secure the proper size and quality.

Luther Cox of Mexia reports the following average yield from 50 trees: 4½ bushels per tree the third year, 4½ bushels per tree the fourth year and 8 bushels per tree the fifth year.

"I find the Frank peach introduced by J. W. Stubenrauch to possess every good quality unless it be that of over-bearing. A vigorous grower, a regular and sure bearer, large when properly thinned and quality among the best."—F. B. Bond, Fruit Grower, Mexia, Texas.

We recommend the Frank as one of the best commercial peaches for Central Texas. It has the following good points: The tree is healthy and a very rapid grower. The fruit is very uniform in size, highly colored and of extraordinary quality. It is deliciously sweet canned without sugar. It will keep from one week to ten days after being gathered and can be hauled to distant market in fine condition. The Frank peach means a new era for the peach business. It is a cross between Elberta and Bell's October.

Tena: Similar to Elberta in color and shape but from one week to ten days earlier in ripening. It has a brighter red color than Elberta and the quality is much better. It is a cross of Mamie Ross with Elberta. It blooms late with Mamie Ross and is rarely injured by cold. This high class yellow freestone beats the Elberta to market.

Barbara: A sister seedling of Frank but a freestone. It has the same vigor of tree and sure bearing habit of the Frank with a beautiful shape, being pointed at the lower end. It is a good canner and shipper. A fifteen-year-old tree in the Stubenrauch orchard has a spread of 37 feet and has borne 10 bushel crops at several different times. It ripens about August 10th with the Frank.

Mr. Stubenrauch has been breeding and improving peaches for nearly 40 years. His peach varieties are noted for sureness in bearing, vigor of trees, size and quality of fruit.

We are glad to announce that we have arranged with Mr. Stubenrauch to grow and offer for sale his best peaches. We are filling his orders for trees as well as our own.

I want to especially call your attention to the Frank that is one of the fastest growing and heaviest bearing varieties of peach known. The Frank, Tena, and Barbara are especially adapted to the regions where late frosts kill the fruit.

J. W. STUBENRAUCH

Age 84

The Peach Wizard of Texas

Comanche Postmaster Likes The Frank Peach

January 10, 1936.

Dear Mr. Wolfe:

I have been growing the Frank peach for 8 years and it has produced a crop every year for me. I regard it as the most promising variety and the surest bearer. I would advise planting it on good soil and thinning the fruit for quality. I am planting more Frank trees. I am,

Sincerely yours,
J. R. EANES,
Comanche, Texas.

Johnson County Farmer Has Frank Peach Bearing Seven Years

Grandview, Texas, Jan. 3, 1936.

Der Mr. Wolfe:

I have 50 Frank peach trees that have been bearing 7 years. Not a crop failure except one year from hail. Frank produced when Elberta and other varieties froze out. I am,

Sincerely yours,
HOMER HUTCHINS.

Cash Discount of 5% to those who come to the nursery to buy!

Frank Bears Five Times as Much as Elberta
Goldthwaite, Texas, Jan. 3, 1936.

Dear Mr. Wolfe:

The Frank peach is ideally suited to this locality. It out bears Elberta 5 to 1 and is the only peach I would want to plant commercially. I have 350, 30 months old trees that produced 175 bu. in 1935. I have 400 Frank trees up to eleven years, the oldest of which have averaged producing 5½ bushels per tree for the past 5 years which sold at an average of \$2.50 per bu. in 1931. The average price for the past 5 years has been \$1.55 per bushel. I am,

Sincerely yours,
GEO. ROBERTSON.

Frank Peach Sells for \$2.25 Per Bushel
Marble Falls, Texas, Dec. 23, 1935.

Dear Mr. Wolfe:

I have 300 bearing trees of Frank and over 400 Frank just coming into bearing. They come in to bearing the third year and out of 13 years trial they have never failed to bear a heavy crop except this year, the crop was light due to 1935 drouth. I have been selling Frank peaches on the San Antonio market for \$2.00 and \$2.25 per bushel. I am,

Sincerely yours,
KURT SCHROETER.

PLUMS

Six Weeks: Large, rich red and delicious. Ripe May 20th.

America: Tree very thrifty, fruit medium to large bright golden with pink cheek; flesh firm.

Burbank: Large, clear purplish red, flesh deep yellow. Very prolific.

Bruce: June 1. Large, red, productive. T hybrid originated by Mr. A. L. Bruce of Donley County, Texas. Early ripening, large size, firm shipping quality, and productive. The most profitable of all plums.

Shiro: Large, oblong, clear, transparent yellow; with very small seed. Quality unsurpassed for eating.

Prices on plum trees prepaid:

Size	each	dozen	100
1 to 2 ft.....	15c	\$1.65	\$12.00
2 to 3 ft.....	25c	2.85	16.00
3 to 4 ft.....	35c	3.25	20.00
4 to 5 ft.....	45c	4.30	31.00
5 to 6 ft.....	60c	6.50	38.75

PLUM-CHERRY

Compass: A hardy fruit, supposed to be a cross between Miner Plum and one of the Cherries. Tree a vigorous grower, hardy, prolific, and bears extremely young.

Opata: A beautiful sight when in bloom and is very fragrant. Fruit medium; purplish-red splashed with green; flesh greenish in color and very pleasant in flavor. Clingstone. Ripe last of June and first of July. Tree hardy, a spreading grower, and bears quite young.

Sapa: Tree somewhat dwarfish, thrifty, and often sets fruit in the nursery row at one year. Fruit large, dark purple with greenish splotches; flesh rich, dark purple-red, of rich flavor, and with small pit. Excellent for cooking purposes. Clingstone. Ripe last of July. Price same as plum trees.

Cash Discount of 5% to those who come to the nursery to buy!

PRUNES

German Prune: This is an even cross between a plum and a prune that will grow and bear in Texas. The size of the fruit is from 1½ to 2 inches in diameter, round in shape, blue black in color with reddish meat and very small seed. The fruit is very delicious and is good for jelly, preserves and canning. Ripens from July 10th to 20th, and will stay on the trees several days after ripening. It can be marketed with Elberta peach. I secured my start of this from a ten-year-old tree in Comanche, Texas, which was over one foot in diameter. It has produced a crop of fruit every year.

Prices on German Prune trees:

2-3 ft. each, \$.35; dozen, \$3.60; 3-5 ft. each, \$.60; dozen, \$6.50; 5-7 ft. each, \$1.00; dozen, \$10.00.

APRICOTS

Prices on apricot trees prepaid.

Size	each	dozen
1 to 2 ft.....	\$.15	\$ 1.65
2 to 3 ft.....	.25	2.30
3 to 4 ft.....	.40	4.30
4 to 5 ft.....	.50	5.15
5 to 6 ft.....	.70	7.50

Early Golden: Medium in size; yellow. Ripe in June.

Moorpark: Large; flesh bright orange, separating easily from the seed. Grown largely for commercial purposes. Ripe in June.

Cluster: Grows well and bears young, late bloomer. A good tree to plant; does not require cultivating.

QUINCE

Price: 75c each, \$8.00 per dozen, prepaid.

The quince is one of the finest fruits for preserves, the flesh becoming a beautiful dark red when cooked, and the trees thrive anywhere and always have a good crop.

FIGS

Prices on figs, prepaid:

Small, 20c each; \$2.00 dozen; medium, 35c each; \$3.50 dozen; large, 50c each; \$5.00 dozen.

Ramsey's: This fig was introduced by Ramsey's Nursery. One of the best figs grown. Sold by some nurseries as the Harrison.

Magnolia: Very large, brownish straw color; excellent for canning and for preserves. Will bear on one-year stems.

Brown Turkey: Sweet and good. Has habit of bearing on new wood, even fruiting in the nursery row.

Celestial: July. The common little blue fig. None is sweeter; very hardy.

JAPANESE PERSIMMON

The leading fruit of the lower South. Demand increasing for in excess of the supply.

Price on Japanese Persimmon, prepaid:

Size	each	dozen
1 to 2 ft.....	30c	\$3.00
2 to 3 ft.....	40c	4.00
3 to 5 ft.....	55c	5.50

Eureka: If you like your persimmons soft, to be eaten as a salad fruit, you will want to plant the popular Eureka. Every year more people are enjoying in November and De-

ember ripe Eureka with sugar and lemon juice, a dish fit for a king. The Eureka is a hardy variety that bears profuse crops of fruits which look like big red tomatoes.

Tane-Nash: Very large, roundish, conical, pointed; very smooth and symmetrical; color of skin light yellow, changing to bright red at full maturity; flesh yellow, generally seedless, astringent until fully ripe, then one of the best.

PEARS

Garber: Resembles the Kieffer in size, appearance and quality, but matures here in August.

Kieffer: Fruit large to very large, skin yellow, with a light vermillion cheek.

Prices on pear trees postpaid:

Size	each	dozen
2 to 3 ft.....	30c	\$3.20
3 to 4 ft.....	40c	4.10
4 to 5 ft.....	50c	5.70
5 to 6 ft.....	70c	7.50

APPLES

Prices on apple trees prepaid.

Size	each	dozen
2 to 3 ft.....	30c	\$3.50
3 to 4 ft.....	40c	4.50
4 to 5 ft.....	50c	5.75
5 to 6 ft.....	70c	7.50

Delicious: A magnificent variety of fine appearance and delightful flavor; large size. Best known variety. November.

Jonathan: In appearance and quality one of the best apples grown.

Early Harvest: The best early apple grown. Ripens in June.

Golden Delicious: Same as Delicious except yellow.

ALMONDS

Texas: Now one of the most popular almonds commercially because of its extremely heavy, consistent crops of small soft-shelled plump nuts, excellent for shelled kernels. A late bloomer. 75c each. Prepaid.

MULBERRIES

Hicks Mulberry: A strong, upright, fast-growing tree with dense foliage, thriving anywhere and furnishing excellent shade .Bears good sized delicious black berries. A tree for the bird-lover, whether it be robins and bluebirds, or only White Leghorns. Splendid for chicken runs. 8-10 ft., \$1.25; 6-8 ft. \$1.00; 4-6 ft., 75c; 3-4 ft., 50c.

THE GRAPE

(Prices are prepaid)

Grapes: Strong plants: 25c each, \$2.50 per dozen; \$15.00 per 100. Light plants: 15c each; \$1.50 per dozen; \$9.00 per 100. Niagara, Herbemont, Concord and Carman. Thompson Seedless.

Niagara: The best white table grape.

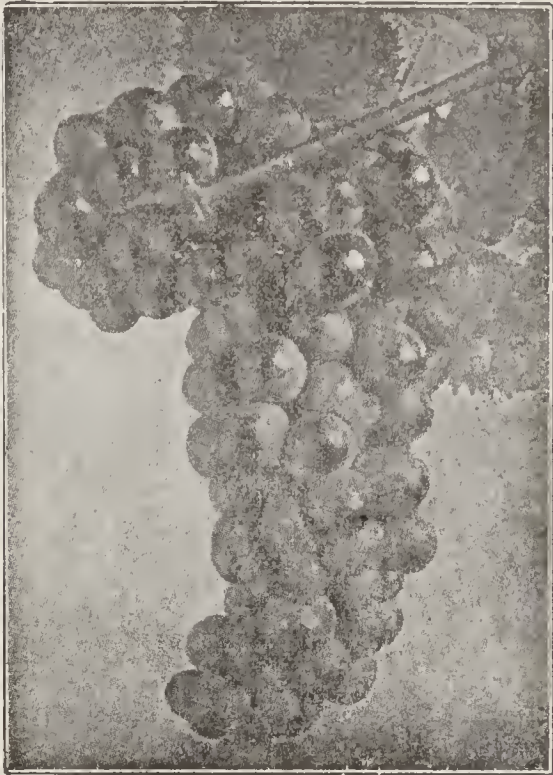

Concord: The old standby in grapes.

Cash Discount of 5% to those who come to the nursery to buy!

Carman: Growth vigorous; foliage never attacked by leaf folder or mildew; prolific. Cluster large, conical, compact. Berries persistent, medium, globular, black with thin bloom; skin is thin, tough, never cracking; pulp meaty, firm, tender, when ripe; rich quality, superior to Concord; seeds easily—leaving pulp. Ripe August 10.

Hebermont: July. Medium size, round black; not good when first it turns black, but delicious when thoroughly ripe; vine robust and long-lived.

Thompson Seedless: The best known seedless grape, widely planted for raisins and market and a fine home fruit as well. Very large bunches of rather small, greenish-yellow berries, sweet and mild. Canes should be pruned long. August. 10c higher than other varieties.

CARMAN—The Old Standby in Grapes

Hebermont: July. Medium size, round black; not good when first it turns black, but delicious when thoroughly ripe; vine robust and long-lived.

Thompson Seedless: The best known seedless grape, widely planted for raisins and market and a fine home fruit as well. Very large bunches of rather small, greenish-yellow berries, sweet and mild. Canes should be pruned long. August. 10c higher than other varieties.

DEWBERRIES

Austin Dewberry: Probably the best commercial variety for Central and North Texas. Large, fine flavor, and especially good for jams and jellies. A vigorous grower and very prolific. Ripens in May and June. Price: 25 for \$1.00; 50 for \$2.00; 100 for \$3.00; 1000 for \$18.00.

YOUNGBERRIES

The Youngberry originated in Louisiana 25 years ago as a cross between the Phenomenal Berry and the Mayes-Austin Dewberry. It has now attained amazing popularity.

Strong plants: 15c each; 10, 90c; 100, \$4.90; 1000, \$30.00.

SEND US THE NAMES OF YOUR FRIENDS

If you have a friend who is interested in buying trees or budding and grafting, you can do him a favor and us a service by sending us their names and addresses.

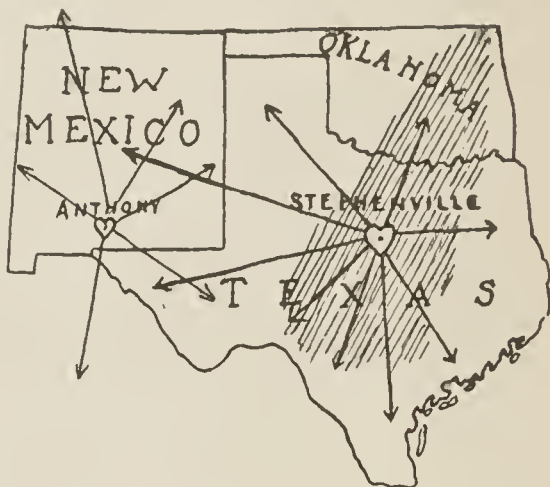

VISITORS WELCOME

We are glad to show our thousands of visitors our orchards, how our trees and plants are grown and propagated, how they are dug, packed and handled. We are glad to show you how to bud and graft as you watch this done in the nursery.

THE WOLFE NURSERY AND ORCHARD IS ONE OF
THE SHOW PLACES OF CENTRAL TEXAS

Stephenville is located 70 miles southwest of Fort Worth on Highways 10, 67 and 66. You are invited to come to our nursery 2 miles west of Stephenville on Highway 10 to make your own selection, or to just enjoy looking at our nursery and orchard.

Sixty-five per cent of the native pecans of the world are grown in the shaded portion of this map—All the Western varieties advertised in this catalog originated within one hundred miles of my nursery. I am located in the geographic center of this area.

Main nursery, Stephenville, Texas; branch nursery, Anthony, New Mexico.

"Where Visitors Are Always Welcome"

The stone in this building was gathered from many
far distant points.

Cash Discount of 5% to those who come to the nursery to buy!

CLUSTER OF JOHN GARNER PECANS

THE JOHN GARNER PECAN

This is a new variety named "John Garner," for our most distinguished pecan grower, The Vice-President. A promising seedling of San Saba Improved, running 46 nuts per pound, 61 per cent meat. Winning the John Garner prize for the best seedling pecan in Texas. It is as large as the Burkett and much more prolific. We have the exclusive right to propagate this variety.

This pecan was created by E. E. Risen, famous pecan breeder of San Saba, Texas, from the San Saba Improved variety. It won the John Garner cash prize for the best unnamed pecan in Texas. By his permission it was named after him.

We own the exclusive right to propagate this variety and a plant patent for it is now pending. No buds or grafts should be used to multiply this variety without securing our permission.

The mother tree is 13 years old, 40 feet high, 36 inches in trunk circumference, with a top spread of 34 feet. It began bearing when six years old and has never failed to produce a crop since. It is growing in black soil where the water table is 35 feet. It produced 74 pounds of nuts in 1931, 46 pounds in 1932 and 92 pounds in 1933, 30 pounds in 1934. From 60 patch buds set in the spring of 1933 more than 400 produced nutlets in 60 days from the time the buds were put on, some of which matured.

The nut is somewhat longer than the Burkett, being perfectly round at the stem end and flattening toward the blossom end. It is the same size as the Burkett with 5 per cent more meat. "It is far superior to the Burkett in every respect," says E. E. Risen.

This New Deal Pecan Has the Following Superior Qualities:

1. Easy to propagate.
2. Produces nutlets the first year from buds or grafts.
3. Healthy, strong and vigorous tree.
4. Bears nuts all through the top.
5. Bears every year.
6. Puts out late in spring and ripens early in fall.
7. The most beautiful nut grown. A real paper-shell, with kernels easily removed in halves.

8. Creamy plump kernels, every nut is a good one.

9. Kernels rich in oil, protein, carbohydrates, vitamins and flavor.

Prices on John Garner Buds and Grafts. Prepaid:

12, \$1.60; 25, \$2.80; 50, \$4.90; 100, \$8.60; 500, \$36.00; 1000, \$64.00.

These buds are sold under patent restrictions.

Trees: 4 to 6-ft. tops, \$2.85 each. In lots of 10 or more, \$2.45 each. 7-ft. to 9 ft, \$4.00. In lots of 10 or more, \$3.60 each.

WRITE ME

If you want to know about whether your soil is suited to pecan culture give me a full description of your soil and sub-soil, list the plants that do best of it, give your water table, and soil texture. If you want to know about varieties, give your altitude, rainfall, and whether you have river bottom, semi-upland or upland. If you are interested in pollination, insects, cultivation or cover crops write me your specific problems and we will do our best to give you some helpful information. If you can visit me and see my orchard and see our nursery of fruit trees, ornamentals and pecans.

BUDDING BULLETIN FREE

If you would like to learn to bud and graft pecans, persimmons, walnuts, hickory, fruit trees or grapes you will please write us asking that your name be put on our mailing list for the budding bulletin which will be mailed out in February of 1936.

PAPER SHELL PECANS

Prices on Western varieties of Pecan trees, F. O. B. Stephenville:

Size	1 to 9	10 to 49	50 to 499	500 up
2 to 3 ft.	\$.95	\$.85	\$.70	\$.60
3 to 4 ft.	1.05	.95	.80	.70
4 to 5 ft.	1.20	1.10	.90	.80
5 to 6 ft.	1.40	1.30	1.05	.90
6 to 7 ft.	1.60	1.50	1.20	1.00
7 to 8 ft.	1.90	1.65	1.40	

Varieties: Burkett, Western Schley, Texas Prolific, Halbert, San Saba Improved, Onliwon, Squirrel's Delight, Jersey Commonwealth.

Burkett: The Burkett nut is large, almost perfectly round, thin soft shell, plump kernel and excellent flavor. The kernels release very readily, coming out in whole halves. It is an early and regular bearer. The tree is healthy and vigorous. It is the most popular variety in the uplands and semi-uplands of Texas and Oklahoma.

Western Schley: This nut is long, resembling the Eastern Schley. It runs 59 nuts to the pound and 60 per cent meat. The shell is thin and cracks and separates very well. Its popularity is due to the rapid growth of the tree and its regular and heavy bearing habits.

Halbert: This variety should be called our most drought resistant pecan. It originated near mesquite trees in Coleman County, Texas. I have had little trees in the nursery row to produce as many as 50 nuts. It never fails to bear. The mother tree has averaged 200 pounds of nuts for the last 30 years.

Texas Prolific: (Sovereign) As the name implies this is a very prolific variety. The tree frequently produces nuts in the nursery row. The trees are slender in growth which makes them difficult to grow in the nursery. The nut ripens fairly early which makes it succeed as far north as Bartlesville, Oklahoma.

San Saba Improved: This is one of the best nuts of the entire pecan family. It has won more blue ribbons than any

other western variety. The nuts run about 55 per pound and 61 per cent kernel. The kernels are smooth and light in color and of the highest quality. They release perfectly from the shell. The nut ripens very early, which should make it suited to the section having short season.

Squirrels Delight: The chief merit in this pecan is its earliness; the first for the squirrels to get, hence its name. A large showy nut, and the first good seller on the market.

Onliwon: (Only one) is strictly a papershell. The crackling quality is all that can be desired—60 per cent meat. This is one of the finest pecans grown—a winner of blue ribbons in state and national shows.

Jersey: This variety has not been tried out over a wide area. It won the prize as the best pecan sent in to the Texas Department of Agriculture out of 70 varieties. I regard it as very promising for the Western belt of Texas.

Commonwealth: This variety puts its leaves and blooms out later than any variety in our orchard. The nut is similar to Squirrels Delight, but larger, better in color of meat and higher per cent meat.

Prices on Eastern varieties of Pecan trees, F.O.B. Stephenville.

Varieties: Success, Schley, Stuart, Moore and Delmas.

Size	1 to 9	10 to 49	50 to 499	500 up
2 to 3 ft.	\$.85	\$.75	\$.60	\$.50
3 to 4 ft.95	.85	.70	.60
4 to 5 ft.	1.10	1.00	.80	.70
5 to 6 ft.	1.30	1.20	.95	.80
6 to 7 ft.	1.50	1.40	1.10	

Success: This is the most popular Eastern variety in Texas. The nut is very large and oblong, with plump smooth creamy kernels that release perfectly from the shell.

Schley: This is the standard of excellence among pecans.

Stuart: Stuart has a wide range of adaption in the Eastern belt, but should not be planted in the higher and drier altitudes.

Delmas: The nuts are large, perfectly shaped, medium shell and meats that come out readily.

Chestnut: (Mahan)—Through courtesy to the nursery that introduced this variety we have discontinued propagating it. We have a few hundred trees on hand that we are closing out.

3 to 5 ft trees, \$2.00 each; \$20.00 dozen; 5 to 8 ft. trees, \$2.85 each; \$28.50 dozen. Prices F. O. B. Stephenville.

SIZE OF PECAN TREES TO PLANT

The trend each year is to plant larger pecan trees. The 4 to 5, 5 to 6, 6 to 7 and 7 to 8-foot are all good sizes for commercial planting. For yards or places where pecan trees can be cared for plant trees from 7 to 12 foot for quickest and best results.

ROOT PRUNED PECAN SHADE TREES

- 1- In. caliper, \$2.00 each; \$17.50 for 10; \$150 per 100.
- 1¼-In. caliper, \$2.75 each; \$25.00 for 10; \$225 per 100.
- 1½-In. caliper, \$3.50 each; \$33.50 for 10; \$300 per 100.
- 1¾-In. caliper, \$4.25 each; \$40.00 for 10; \$375 per 100.
- 2-In. caliper, \$6.50 each;
- 3- In. caliper, \$10.00 each.

Prices: Packed, F. O. B. Stephenville, Texas.

Varieties: Burket, Texas Prolific, Halbert.

These trees are six and seven years old with straight stems and branched tops. They were root pruned in March, 1935, cutting the tap root and some side roots causing the tree to partly recover from this shock and making it put out a heavy set of lateral roots. Most of these trees are producing nuts in the nursery, many of them ripening from 50 to 150 Nuts.

ENGLISH WALNUTS

Wilson Wonder: Called the "Jumbo Walnut" because of its enormous size, the individual nuts often measuring more than 2 inches in diameter. Offered in the stores at Christmas time for very fancy prices. Bears very young and heavily. A hardy tree.

THE THOMAS BLACK WALNUT

Everyone who has lived in the East and Middle West has had experience in cracking the thick shells of the old Eastern Black Walnut and in prying out the little portions of the kernel that could be obtained. The Thomas is a selected strain of

Cash Discount of 5% to those who come to the nursery to buy!

the Eastern Black Walnut with a comparatively thin shell which cracks easily, has light colored kernels, with the same old delicious flavor which tastes so good in cakes and other confections. It makes a beautiful big tree anywhere and bears heavy crops even while young.

Prices on Thomas Black Walnut and Wilson Wonder English Walnut trees are the same as prices on Western Varieties of Pecan Trees.

Black and English Walnuts can be budded and grafted on native black Spanish walnut stock.

BUDS AND GRAFTS

VARIETIES: From the 100 varieties we are growing we have selected the following varieties from which we will have buds and grafts:

Western Schley, Delmas, Odom, Burkett, Moore, San Saba Improved, Success, Kincaid, Halbert, Onliwon, Alexander, Stuart, Moneymaker, Clark, Texas Prolific, Altman, Squirrels Delight, Jersey.

Prices on Eureka Persimmons, buds and grafts, same as pecans.

PRICES ON PECAN AND JAPANESE PERSIMMON, BUDS AND GRAFTS

DELIVERED by PARCEL POST. 25c 75c; 50, \$1.00; 100, \$1.75; 500, \$7.50; 1000, \$12.50; 5000, \$50.00.

Note: 5c per bud will be charged when the order includes less than 25 of any one variety.

In orders including several varieties, a straight charge for each variety will be made. For example, if an order of 100 buds includes 25 buds of four different varieties, the price of 75c will be charged for each variety, making the amount \$3.00 for the 100 buds instead of \$1.75 as listed above.

Prices on Buds and Grafts of Chestnut (sold as Mahan) Pecan, Wilson Wonder English Walnut and Thomas Black Walnut. All Buds and Grafts Prepaid.

75c for 12; \$2.25 for 50; \$4.00 for 100; \$30.00 for 1000.

Note: Not less than 12 Chestnut Pecan (Mahan) or Walnut buds sold. Please make bud orders total \$1.00. Walnuts bud more easily than they graft.

GRAFTS OF SHELL BARK HICKORY

We have a shell bark hickory that can be budded or grafted on pecan that makes a beautiful shade tree and thin shell hickory nuts. 6-inch grafts \$1.00 per dozen.

GRAFTS OF JAPAN HART WALNUT

This is a hardy walnut which we got from Japan which produces regular crops of high class walnuts, with clusters of 5 to 12 nuts to the bunch. This variety should be budded or grafted with the English Walnuts on the native walnuts to furnish pollen for them. Buds or grafts, \$1.00 per dozen.

MAHER — GROSH

TEXAS PECAN PATCH BUDDER

This popular and universally used knife opens and shuts, can be carried in your pocket and is in every way adapted to the needs of patch budding.

With this knife the patches can be cut and removed without the aid of any other knife. We guarantee these knives. Prepaid—each, \$1.50.

Wax cloth for patch budding, 1½x2 inches—25c per 100.

Buddings Strings, cut into lengths—15c per 100.

Patch Budding Knife, made with safety razor blades—50c.

Cash Discount of 5% to those who come to the nursery to buy!

ROSES**"THE CHOICE OF THE WORLD"**

We are content to grow and send out only the strongest, sturdiest, field grown rose bushes that it is possible to produce.

PRICES ON MONTHLY ROSES

Strong, two-year-old field grown: Light grade, 15c each; \$1.50 per dozen; medium grade, 25c each; \$2.50 per dozen. Heavy grade, 35c each; \$3.50 per dozen.

Yellow Roses

Lady Hillingdon.

Luxembourg: Grand golden yellow rose. Strong grower, heavy foliage; a good rose.

Sunburst.

Pink Roses

Radiance, J. L. Mock, Countess of Ilchester, Willomere, Los Angeles.

White Roses

Kaiserin August Victoria.

Red Roses

Frances Scott Key, Red Radiance.

Two or More Colored Roses

Every Rose Garden Must Have Hoover and Talisman. President Herbert Hoover, Talisman.

CLIMBING ROSES

Prices same as bush roses.

Climbing American Beauty: Like American Beauty, but strong climber.

Paul Scarlet: Beautiful scarlet red climbed.

Climbing Meteor: Flower similar to Meteor; vine rugged climbed.

Climbing Columbia: Like Columbia except a climber.

SPECIAL ROSES

Price on Special Roses, 50c each.

E.G. Hill: Immense flowers of very lasting, dazzling scarlet, never fading or turning blue, but actually becoming deeper red as it opens. The flowers are borne on long stems, and are deliciously fragrant. The foliage is abundant. Its brilliant color, extraordinary freedom of bloom, and lasting qualities have made it a popular rose everywhere. 50c.

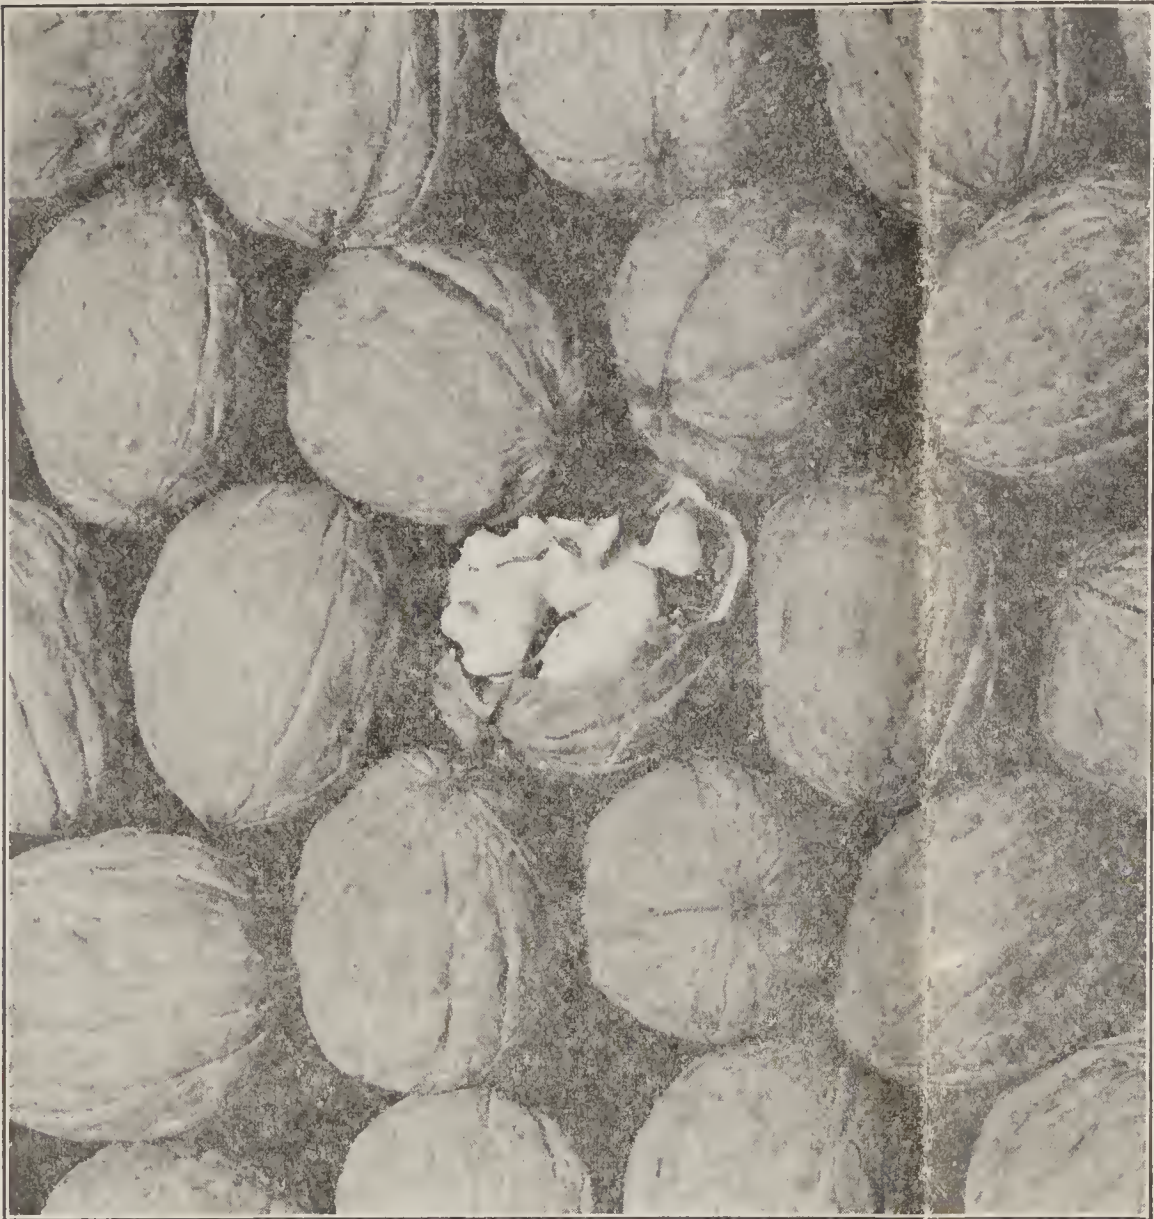

Etoile De Hollande: This magnificent red rose is ranked among the first three of its color by everyone who knows roses, and many will place it first. The perfect buds are of medium size, opening beautifully and cleanly into glorious great flowers with incomparable fragrance, holding its brilliant color to the end. The bush is strong, free branching, and healthy. A rose that actually has no serious fault, and every new red rose is automatically compared with it. 50c.

Padre: Rich copper-scarlet. The flowers are semi-double, borne on long straight stems on a tall bush. While tending to hang its head when cut, the remarkable color and freedom of bloom make Padre a fine rose. 50c.

Hadley: In the Hadley we have a rose that possesses a rich and lasting crimson color, coupled with vigor of growth, robust constitution, and free-blooming habit.

Priscilla: Pink rose with buds over two inches long. Unequaled.

Cash Discount of 5% to those who come to the nursery to buy!

GRANDE ENGLISH WALNUT

This is a new English Walnut which originated in the Southwest by planting seed of the hardy French variety, the Franquette. It will stand extremes in weather of both heat and cold. It is the hardiest variety on our grounds of 16 varieties.

COMBINATION FRUIT TREE

Burbank, plum, Moorpark apricot and Elberta peach all budded on one tree. This tree will bear three kinds of fruit. 50c each.

CORNFIELD BEANS

For ten years I have been working to get the pure strain of Cornfield Bean like they grow back in Georgia. It is hardy, and extremely prolific and while it is a pole bean it makes just fine as a bush bean. In early spring or in the fall there is always a good demand for good stringless snap beans. For fall beans I plant July 1st and I have made at the rate of from \$400 to \$1,000 per acre from year to year. Package, 15c; Lb., 40c; 5 Lbs., \$1.75, postpaid.

POKE SALAD

Did you ever go out in the early spring and get tender poke greens? I like them cooked with several slices of bacon in them. Each year this plant is getting scarcer because it is being eaten by livestock. Since it is the healthiest green that is grown, I have decided to grow it in my garden and send the tubers and seeds out to our customers. It beats Popey's spinach. Once started, it will come from the roots every year. Package of seed, 25c. Postpaid.
